

FLU Lighting – Case Study

CNC Associates

AFTER

101 Kentile Road, S. Plainfield, NJ

Description of Work:

Energy Retrofit Co. helped CNC Associates utilize the NJ Clean Energy Rebate Program to upgrade over 450 outdated 400W Metal Halide fixtures with the new T8 Fluorescent High Bay fixtures with “Step Dimming” technology. The project will reduce annual energy cost by \$70,140 per year, and dramatically improved the lighting.
