

# FLU Lighting – Case Study

## Sharp Distribution

Rancho Cucamonga, CA

## Description of Work:

Energy Retrofit Co. helped Sharp Electronics save by upgrading 385 fixtures from 400W Metal Halide to 4 Lamp T5 Fluorescent with occupancy sensors included. The annual Energy savings was projected to **be approximately \$110,000 per year**, based on the 120 hour per week operation.

Local utility (SCE) rebates covered **90% of the project cost** to upgrade.
