

LED Lighting – Case Study

Trinity Church, Temecula

30470 Pauba Road, Temecula CA

Description of Work:

Energy Retrofit Co. helped the Trinity Lutheran Church upgrade over 120 of the **6" Can fixtures to the new 12W LED Can Retrofit** reducing energy cost, and eliminating maintenance. The new LED's will last an **estimated 40,000 hours or 15 years** based on the current operation of the church.

"We love our new LED Can lighting!!! I was blown away by the improvement in light output. Energy Retrofit did exactly what they said they would do, and in a highly professional manner. Excellent service and excellent product."

Bill Grey, Maintenance Supervisor
